1. INTRODUCTION
Nowadays, worldwide are facing the same problem the new virus was named the “COVID-19 virus”. To avoid this disease is not widespread the Indonesia government assigns all Indonesian to stay at home. So that education forced to replace face-to-face learning with online learning. As the popularity of the Internet grows, so does the potential for online learning. (Gilbert, John, & College, 2015) Online learning can be defined as “learning that takes place partially or entirely over the Internet”. It is clearly that the internet is the basis for the existence of an online learning process. For example, in education the teacher uses internet network in delivery material, task, or homework. So that the online learning refers to technology, network, and media.

Talking about online learning, of course we need an application as a bridge between teachers and students. (Wijaya, 2018), (Laili et al., 2020),(Okmawati, 2020) explain types of applications such as whatsapp, Zoom Meeting, In this research only focuses on Google Classroom. Because, the researcher found that the students show different response to the use of Google Classroom. Some students show good response and negative response about the features and the use of Google Classroom for online learning.

Google Classroom is an internet-based service provided by Google as an e-learning system (Alim, Linda, Gunawan, & Saad, 2019) (Alim et al., 2019). It means that a free web service, developed by Google for schools, that aims to simplify the creation, distribution, and assessment of assignments without having to meet face-to-face. Another expert who defines of Google Classroom is a web-based E-learning application developed by Google (Deiniatur, 2019) It means that Google Classroom is developed by Google itself for online learning purpose. Google Classroom also has features that support online learning. Features on Google Classroom consist of three pages, they are: stream, classwork and people. (Harjanto & Sumarni, 2019).

Features on Google Classroom about Sream is a notification page where a teachers focus or including on announcement and post or like chat from teachers. It explains that the students can reply to the information given by the teacher. Then, stream facilities can improve students’ ability to communicate. Second, Classwork is the main page that allows teachers to organize assignments into modules and units. It means that is the where place teachers can create
questions, quizzes, assignments, and post materials for students. The material uploaded can be in the form of articles, text, images, audio, videos, and several other teaching materials. In addition besides supporting material, the progress about the work by students can be seen by the teacher. Last is people, this menu is participant like teacher and students as a member of the class (Wong, 2020). It means that has a function to know who are the participant that joins the meeting. So, the teachers knows who the students have joined in the meeting or not.

SMA N 03 Kota Solok ever to using Google Classroom for the online learning process. Some students show good responses about the features and the use of Google Classroom for online learning. It can be seen from their motivation in submitting the task. However, some students show negative responses about using Google Classroom for online learning. It shows that response by ignoring the task from the teacher by giving many reasons.

2. METHODS

The researcher describes how are students' response to the features of Google Classroom for teaching English during online learning. Second, how are students' response about using Google Classroom for teaching English during Online learning. The last is why do the students give positive and negative responses. In this research, the researcher used purposive sampling because she only focus on the teacher who using this application. In this research the sample was students grade at X at SMA N 03 Kota Solok for this research. They are X.MIA’1 and X.IPS’2. So, the total respondents from two classes are 68 respondents.

In this study, the researcher used two kinds of instrument to collect both of them. They were questionnaire and interview. On the data collection researcher makes a questionnaire related to the theory in the chapter II and shared by Google form. With the questionnaire the researcher gets the data and analyze how are students’ responses about the features of Google Classroom and how to use this application. then, after geting the information researcher interview 15% of respondents via chatting to collect their answers. She makes list of the questions interview. The type of interview is semi-structure interview because she wants to get data clearly. After made list of the question, the researcher is gone to interview. And then, she analyzed the data to find out the results of a reasons responden to gave positive or negative response about using Google Classroom for teaching English during online learning.

3. RESULTS AND DISCUSSION

The researcher explains the finding of research about:

<table>
<thead>
<tr>
<th>1. Features on Google Classroom</th>
<th>2. The way of using Google Classroom</th>
</tr>
</thead>
<tbody>
<tr>
<td>Positive</td>
<td>Negative</td>
</tr>
<tr>
<td>84,19%</td>
<td>15, 82%</td>
</tr>
<tr>
<td>Positive</td>
<td>Negative</td>
</tr>
<tr>
<td>76,90%</td>
<td>23,11%</td>
</tr>
</tbody>
</table>

In the table above the researcher had found analysis the data percentage from questionnaire to the answer research question number one of the students' responses about how are students’ responses about the features of Google Classroom for teaching English during online learning. The result of the data from the questionnaire that the features of Google
Classroom higher 84.19% positive response rather than 15.82 negative response. So that the student's response about features of Google Classroom positive response. The second of the research question how are students’ response about using Google Classroom for teaching English during Online Learning. In the results of the data higher 76.90% positive response and 23.11% low negative response. So that the students' response about the way of using Google Classroom higher positive response. The result of the data from interview why do the students given a positive response about features on Google Classroom is useful for during pandemic, interested of the view web, unique, more efficient, this application easier to access and more organize for online learning process. The result for interview the researcher why do the students give negative response about using of Google Classroom. The result for interview the researcher why do the students give negative response about using of Google Classroom the reasons is before joined in the class student must have code class and also ask to the teacher firstly sometimes the teacher was not fast response and also code class complicated.

4. CONCLUSION

Based on finding as study already discuss in the previous chapter, the researcher concluded that students response for features features of Google Classroom higher 84.19% positive response rather than 15.82 low negative response. Next Students’ response about of using Google Classroom the results of the data higher 76.90% positive response and 23.11% low negative response. The reasons why students gave positive response are useful for during pandemic, interested of the view Web, unique, more efficient, this application easier to access and more organize for online learning process. For negative reasons by students using Google Classroom must have code class and also ask to the teacher firstly sometimes the teacher was not fast response and also code class complicated.

In conclusions, there got higher positive responses about features and the way of using Google Classroom by students X.MIA’1 and X.IPS’2 at SMAN 03 Kota Solok. The reasons why students gave positive response are useful for during pandemic, interested of the view Web, unique, flexible, more efficient, this application easier to access and more organize for teaching English during online learning process.

5. ACKNOWLEDGMENTS

Alhamdulillahirabbil”alamin. Firstly, the researcher would like to express her deepest gratitude to Allah SWT and prophet Muhammad SAW who has given the researcher”s needs, chance, and health to finish this journal with entitle “ The Students Response on Using Google Classroom For English Teaching During Online Learning At SMAN 03 Kota Solok. In completing the journal, the researcher has gotten a guidance, help, suggestion, and constructive comment from many people. In this occasion, the researcher would like to extend her special gratitude to the following individuals Rika Afriyanti, M.Pd and Elmiati M,Pd as advisor and gave idea, suggestion, guidance, and time from the earliest stage of this journal accomplishment.
